the membership of this Legislature. It's been signed by the Governor. If Senator Warner wants 33 votes for this, there's two sides that can vote for it. I certainly would think that there would be a large number that would be opposed to lowering the corporate taxes after we just turned around and said let's do it. I would think if we really wanted to move the bill across that we reject this Warner amendment, leave the other two there, and then let it go at that. I would think this bill would be satisfactory at this point to a number of us if this Warner amendment is rejected, then we can move on to a new subject. I am prepared, if we do not accept this Warner amendment, to withdraw my amendment on the Legislature setting the tax rates because of the lateness in the session. I'd ask you to vote against this Warner amendment and move the bill across.

PRESIDENT: Senator Warner, do you wish to close debate?

SENATOR WARNER: Mr. President, just this. I indicated that I offered it only because of putting the package together for consideration. If you want to reject it, that's fine. I have no strong feelings.

PRESIDENT: The question is the adoption of Senator Warner's ... this particular amendment of Senator Warner. Record your vote. Have you voted? Record. Senator Duis.

SENATOR DUIS: I think we have a very important issue here and probably should have a Call of the House. I'd ask for it.

PRESIDENT: The question is ...
